| Research Progress in Mechanical and Manufacturing Engineering (RPMME) is a single-blind peer-reviewed Perior which publishes 2 times a year (February and September), focuses on the publication of original and innovative research results that contribute to clarify mechanical and manufacturing engineering. The Periodical publishes archival-quality papers in the broad technical areas of engineering included mechanical system and structure, the fluid, design, control system, material, industrial and manufacturing, aeronautic and aerospace engineering, and scientific disciplines as well. The Periodical seeks to emphasize methods that cross disciplinary boundaries based on the Malaysian Research a Development Classification System (MRDCS), the 6th Edition. | dical MAKE A SUBMISSION ermo- other Focus and Scope Editorial Board Guideline for Authors Ind Indexing and Abstracting Publishing Ethics Copvright and License | |

STEP 2 Review comments from the reviewer:

Reviewer Comments

For author and editor

The paper can be improved in the following aspect:

1) Abstract should be improved according to standard abstract structure of Problem -> Objective -> Method -> Result -> Key Finding

2) The introduction section can be compressed to make it more concise

3) In the methodology, only the specific equations used in calculations should be included

4) In results and discussion, a few figures were not referenced in the text. Please provide more information for figures 4 & 5.

5) The conclusion seem to be a little different than what was discussed in the findings. Please re-check

6) More references should be added, a minimum of 15 is required.

7) A few grammatical errors need to corrected.

Check if there is any additional file from your reviewer.

| | Abstract: First abstract sentence introduces the research background information and the problem statement. The second sentence explains the main research objectives and their scopes of study. The third sentence describes the materials, methods, and standard procedures used to conduct the study. The fourth sentence presents key findings and trends that can be observed from the data. The fifth sentence summarizes the discussion regarding those findings and some suggestions for future work. |
